PROFESSIONAL SUMMARY

Applied GenAI & AI Engineer with 2+ years of experience building production-grade AI systems, including RAG pipelines, agent-assisted workflows, and multimodal knowledge assistants. Strong background in LLMs, and Agents, with hands-on experience designing scalable, low-latency AI services. Proven track record of translating real-world business problems into reliable AI solutions that improve decision-making, user experience, and operational efficiency

SKILLS

- **Programming Languages:** Python, SQL
- **Machine Learning:** EDA, Feature Engineering, Supervised & Unsupervised Learning, Ensemble methods
- **Deep Learning:** Neural Networks, Transformers, TensorFlow, PyTorch, Transfer Learning
- **Computer Vision:** OpenCV, Object detection, Semantic Segmentation, Image processing
- **Natural Language Processing (NLP):** Transformers and Embeddings, LSTMs, Text Classification
- **Gen AI:** LangChain, LangGraph, Prompt Engineering, LLMs, RAG, Vector DBs, AI Agents
- **Other Skills:** Web Scraping, Data Collection & Labeling

WORK EXPERIENCE

TERV PRO

Aug 2024 - Present

AI Engineer

- Built and deployed a **RAG-based conversational AI system** handling 5,000+ student queries, enabling 24/7 guidance on learning paths and placement preparation
- Implemented **semantic retrieval pipelines (OpenAI embeddings + Qdrant)**, significantly improving answer relevance and reducing incorrect responses
- Developed a **video-to-knowledge pipeline** by transcribing 100+ hours of content using Whisper, followed by cleaning, chunking, and metadata tagging
- Improved resume-job matching accuracy by **~50%** and reduced manual screening effort by **3.1×** through AI-based resume ingestion, matching, and recommendation workflows

Tech Stack:

Python, LLMs, RAG, LangChain, OpenAI, Streamlit, PostgreSQL

EDUCATION

B. Tech in Electronics and Electrical Engineering

2024

Paavai Engineering college

- CGPA: 8.4/10

XII (BIE-AP)

2020

Sri Srinivasa Junior college

- CGPA 9.82/10
